Job Title: Senior Engineer
Department: Engineering
Reports To: Engineering Manager
Location: Sandy, Utah

WHO WE ARE:
Opengear, a Digi company, is a well-established global and profitable company developing innovative software and appliance solutions for provisioning, orchestration and remote management of network infrastructures. Opengear network resilience and automation solutions are trusted by major enterprises globally for delivering secure, resilient operation for their critical IT infrastructure.

WHAT WE OFFER:
- Challenging software development on our own in-house designed hardware devices
- A collaborative, Agile environment
- Being part of a growing company with in-demand products
- A competitive salary and generous benefits package
- An employee education assistance program to support employees in their ongoing education

WHAT YOU WILL DO:
- Work as part of an Agile team building the software of our next generation hardware devices
- Be part of the whole software process, from design right through to testing and deployment
- Champion good development practices and contribute to our continuous test suite by writing high quality automated tests

WHO YOU ARE:
Required:
- BS Degree in Computer Science or Engineering
- MSCS, MSEE or equivalent experience
- Have 2 years+ commercial experience in C/C++ software development on Linux
- Have experience working in an Agile team environment

Desirable:
- Computer Networking experience
- Python
- Experience maintaining Yocto recipes
- Javascript

Opengear will provide the successful candidate with a competitive salary and generous benefits package.
