opengear

Product Revision Notice

Opengear has upgraded all models in the ACM5000 Remote Site Manager family to Rev 02. These Rev 02 models are a superset of the Rev 01 models, the only change being an increase in the internal memory from 32MB to 64MB (and a change in decal color to red). The Rev 02 and Rev 01 products have the same features and price. They run the same software and can operate interchangeably. As of this notice date the Rev 02 displaces the Rev 01 product.

New Revision Product

Market	Remote Site Management
Product Type	ACM5000 Remote Site Manager
Part Numbers	ACM5002-F-E, ACM5003-M-F-E, ACM5004-F-E, ACM5004-2-I, ACM5004-Gx-E, ACM5004-Gx-I Rev 02
