

Product EOL and SKU Discontinuation Announcement

Opengear announces the end-of-life (EOL) of Lighthouse Hardware Appliances and the discontinuation of various Lighthouse SKU. Lighthouse is now only available as a download for VM deployment.

The last sale date of the hardware is January 31st, 2017. Lighthouse hardware appliance warranty and support is provided by Dell. Please click [here](#) for more details.

The discontinuation of hardware is to provide flexibility for customers looking to deploy Lighthouse on their own hardware or in the cloud. Lighthouse VM is only available as a perpetual license which includes free maintenance for 1 year. Additional maintenance can be purchased on a yearly basis giving users continuous access to upgrades.

Existing customers and License upgrades

Users looking to increase the number of licenses are only required to pay the difference between the cost of the new license and their existing one. For example, a user with 10 licenses can upgrade to 25 licenses and are only required to pay the difference in cost.

Current Lighthouse SKUs

Product Type: Lighthouse VM
