THE OPENGEAR SOLUTION ////

Opengear ensures secure, always-on network resilience for retail locations. Easily manage, integrate and deploy Opengear solutions to enable maximum uptime for point of sale networks.

NETWORK RESILIENCE

An alternate path to devices outside of the production network, **Failover to Cellular**™ and **Smart Out-of-Band (Smart OOB™)** ensures your credit card transactions can be processed and cash registers continually run.

SECURE PROVISIONING

Provision new retail sites with the NetOps Secure Provisioning Module. From configuration management to disaster recovery, automate everything for remote retail networks from one location.

ENTERPRISE-GRADE SECURITY

Smart OOB which supports the ensure management policies

ALWAYS-ON CONNECTIVITY

Utilizing Failover to Cellular, WAN connectivity can be restored without manual intervention. In the event of an outage, maintain visibility of the entire network to reduce downtime.

Never lose a sale again with Opengear — it makes perfect sense
