

Job Title: Engineer II, Senior Engineer

Department: Engineering

Reports To: Development Manager

Location: Sandy, Utah

WHO WE ARE:

Opengear is a rapidly growing, global supplier of sophisticated data center, network and remote site management products. Our customers include tech unicorns and Fortune 100 companies. We are the leading supplier of out-of-band solutions for IT infrastructure management and are actively exploring new solutions for hyper-scale data center deployment and management. We are a global company, with offices in Brisbane, Australia, Sandy-UT, Edison-NJ, and San Jose-CA.

WHAT WE OFFER:

- Challenging software development on our own in-house designed hardware devices
- A collaborative, Agile environment
- Being part of a growing company with in-demand products
- A competitive salary and generous benefits package
- An employee education assistance program to support employees in their ongoing education

WHAT YOU WILL DO:

- Work as part of an Agile team building the software of our next generation hardware devices
- Be part of the whole software process, from design right through to testing and deployment
- Champion good development practices and contribute to our continuous test suite by writing high quality automated tests

WHO YOU ARE:

Required:

- BS Degree in Computer Science or Engineering
- MSCS, MSEE or equivalent experience
- Have 2 years+ commercial experience in C/C++ software development on Linux
- Have experience working in an Agile team environment

Desirable:

- Computer Networking experience
- Python
- Experience maintaining Yocto recipes
- Javascript

Applicants must be authorized to work in the USA.

Opengear will provide the successful candidate with a competitive salary and generous benefits package.
