

Product Change Notification		Date 07/05/2026 Product Notice: OG-260605-01 (updated 07/05/2026)
Product	440016	
Audience	All existing Opengear customers and distribution partners.	
Description of change	Opengear is announcing the End-of-Life (EOL) of part number 440016, a CAT 5 Ethernet cable accessory. Three things are happening together: 1. Accessory EOL. 440016 is being removed from the price list. After the Last Time Buy date, 440016 will no longer be available as a standalone orderable accessory. No standalone replacement accessory will be added to the price list. 2. In-product running change. Inside affected Opengear products, 440016 is being replaced by part number 440089, a CAT 6 Ethernet cable. Units shipping after the change effective date will contain 440089 in place of 440016. Top-level product part numbers are not changing. Form, fit, and function at the top-level product remain unchanged. 3. Optional accessory listing removal. For CM8000 and OM1300, the Ethernet cable was listed as an optional accessory in the product documentation. That listing is being removed. No replacement accessory will be listed. Top-level product SKUs are unchanged. Differences between the outgoing and incoming in-product cables: - Category: CAT 5 (440016) replaced by CAT 6 (440089) - Cable color: blue (440016) replaced by red (440089)	
Reason for Change	This change is driven by component lifecycle management, product improvement, and portfolio simplification. The cable supplied inside Opengear products is being upgraded from CAT 5 to CAT 6. The color change from blue to red gives a clear visual indicator of units built with the upgraded cable. The standalone Ethernet cable accessory is being removed from the price list as part of broader catalogue rationalization. Standard Ethernet cables are widely available through normal channels. As part of this rationalization, Opengear will progressively remove bundled Ethernet cables from new product SKUs. Customers should plan to source Ethernet cables locally for future Opengear product deployments.	
Affected Part Numbers	All SKUs to be discontinued including all regions. EOL SKU: 440016 (CAT 5 Ethernet cable, blue) Replacement SKU:	

	None as a standalone accessory. The upgraded cable (440089, CAT 6, red) ships bundled inside affected Opendgear products and is not separately orderable. In-product cable replacement (440016 replaced by 440089): - OM2200 - CM8100 - ACM7000 The in-product cable swap applies to all current SKUs within these product ranges. Optional accessory listing removed (no replacement): - CM8000 - OM1300 For these products the cable was an optional accessory in the documentation only. The listing is removed. Top-level SKUs are unchanged.

Additional information:	Opendgear's website has a list of suggested migration SKUs https://opengear.com/endlife-products A complete list of SKUs for transition products is found on the Opendgear website https://opengear.com/product-selector/ Opendgear user documentation can be found at website https://opengear.com/technical-documentation/ Contact Sales@Opendgear.com for further information.
EOS Terms and Conditions:	All LTB Purchase Orders are non-cancelable and non-returnable (NCNR). Opendgear reserves the right to adjust order quantities and will contact the customer for consultation if we are unable to fulfill the requested amount. Opendgear reserves the right to make shipments against the total quantity ordered as material becomes available. Standard Opendgear warranty policy will apply to products purchased during the LTB period.
Timing of Change	Products may be purchased until the LTB date or until materials are no longer available. Last Time Buy (LTB): August 31, 2026 In-product transition to the upgraded cable will occur from the change effective date. Units shipped after that date will contain the new cable bundled inside the product.
